Re: Support for S. 2424, Early Hearing Detection and Intervention Act

Dear Senators Portman and Gillibrand:

The Deaf and Hard of Hearing Alliance (DHHA) stands in **strong support of S. 2424, the Early Hearing Detection and Intervention (EHDI) Act**, and thanks you for your leadership on this important reauthorization.

The DHHA is a coalition of consumer and professional organizations that advocate for federal public policies and programs that will improve the quality of life for people who are deaf or hard of hearing, all people with hearing loss, and their support networks. As such, our member organizations support and understand the critical significance of EHDI Programs.

S. 2424 would reauthorize critical EHDI grants, which currently fund state-wide programs that screen newborns for hearing loss before they leave the hospital. Additionally, the legislation would foster early intervention and family support programs that aim to ensure that parents of young children with hearing loss can gain access to early intervention services they need, such as hearing aids and other hearing assistive technologies, language development, and auditory training.

Research has shown that the **early intervention of hearing loss is critical for children** to learn language and develop literacy, providing a pathway for success in their educational and life endeavors. Early detection of hearing loss can dramatically better one's chance to experience a greater number of life opportunities - professionally, academically, and socially. **Furthermore, early detection and intervention of hearing loss has proven to be one of the most cost-effective interventions in health care.**

Although great strides have been made, significant work remains to be done to ensure that infants and children with hearing loss receive timely and appropriate services. **Continued federal funding is necessary to ensure that state EHDI programs remain fully operational and successful so they properly link screening programs with diagnosis**

and early intervention. DHHA encourages all other Senators to co-sponsor the reauthorization of this critical program.

Sincerely,

Susan Boswell
